

CSIR Contract R&D Local and International Funding Portfolio

Strategic and operational plan for the 2010/11 to 2012/13 planning cycle

April 2010

Preamble

The Planning Guidelines for the 2010/11 to 2012/13 planning cycle relevant to the Contract R&D Local and International Funding Portfolio have been taken into account.

The CSIR Contract R&D Local and International Funding Portfolio plays a dual role:

- providing a Portfolio leadership, monitoring, and advisory role to CSIR Units and Centres and CSIR Executive, and
- providing service in a support role to CSIR Units and Centres, and CSIR Executive, based on the agreed strategies.

The CSIR Contract R&D Strategic and Operational Plan reflects these dual roles, and the emphasis within the Portfolio in terms of the dual roles is reflected accordingly.

The Plan specifies a number of KPIs to be achieved. Such KPIs have been derived from CSIR strategies and are linked to KPIs of the Units and Centres.

The plan of the Portfolio takes into account the Plans of the CSIR Units and Centres handed in by 18 November 2009. In a number of cases, CSIR strategies for various focus areas have been developed and have formed the basis of planning.

The revised plan submitted on 15 January 2010 incorporates the Portfolio's response to the key issues raised by the OUs and Centres and in the Strategic and Operational Plan presentation on 11 December 2009.

i Executive summary

• Summarize the overall strategic trajectory that the **PORTFOLIO** intends to adopt over the medium term planning horizon

The CSIR Contract R&D Plan outlines the vision, strategic priorities and aims of the Contract R&D Local and International Funding Portfolio, guided by the CSIR Contract R&D Policy approved by the CSIR Board in February 2008.

The Contract R&D Plan sets out the CSIR strategy for engagement with the public and private sectors and their respective local, African and international segments. It also indicates an increased emphasis on CSIR engagement with State Owned Enterprises (SOEs) and funding agencies, in particular.

The Plan is intended to guide the CSIR in its efforts to foster scientific and industrial development in the national interest in cooperation with principals from the public and private sectors and ensure delivery against its mandate.

The plan is based on the development agenda of South Africa, the role of the CSIR within the National System of Innovation (NSI), the DST Ten Year Plan, and the revised National Industrial Policy Action Plan (IPAP) and associated draft dti Technology Policy Framework¹. The strategic issues raised in the findings of the 2008 CSIR Customer/Stakeholder Survey are taken into account and incorporated into the Plan.

A robust and sustainable Contract R&D Local and International Funding Portfolio is essential to fulfil the CSIR mandate and its role within the NSI. Therefore, the vision, strategic priorities and aims of the Portfolio, <u>and the specific Unit contribution</u>, have been clarified.

• Identify the critical strategic objectives that will signify success

For the Portfolio:

- Quantum Contract R&D income growth
- Quality Contract R&D Local and International Funding Portfolio
 - balanced portfolio of research activities across the value chain
 - recognised CSIR support to national strategies, key national, provincial and local departments as a 'provider of choice' for Contract R&D services
 - recognised as a 'provider of choice' for Contract R&D services to selected private sector partners identified in OU business plans
 - recognised as a 'provider of choice' for Contract R&D services to key selected multinationals
 - recognised CSIR contribution to the African Continent, with strategic alliances and international development partners

For the Unit:

- Portfolio management and reporting
- Institutional strategic relationship management
- CSIR SOE plan
- CSIR Africa plan
- CSIR Target Donor Agency plan

¹ Draft dti Technology Policy Framework

• Summarize the key implementation initiatives to be taken by the **UNIT** during 2010/11 – identify the intended key outcomes.

#	Strategic Focus Area	Key Initiatives	Key Outcomes
1.	Portfolio management	 Institutionalise the strategic relationship management process for key Contract R&D partnerships 	 strategic Contract R&D partnerships
		 KPI monitoring, evaluation and reporting 	 a balanced Contract R&D Local and International Funding Portfolio across the RDI value chain
2.	Public sector	 Facilitate strategic Contract R&D partnerships with selected key Line Departments, provincial and local structures 	 recognised CSIR support to national strategies, key national, provincial and local departments as a 'provider of choice' for Contract R&D services
3.	Private sector	 Strategic Contract R&D partnerships with selected local private sector companies 	 recognised as a 'provider of choice' for Contract R&D services to selected private sector partners and MNCs
4.	Africa	 Implement Africa Contract R&D Plan 	 recognised CSIR contribution to the African Continent, with strategic alliances and international development partners
5.	State Owned Enterprises (SOEs)	 Develop special approaches for (2) SOEs 	 a CSIR that is recognised as a 'provider of choice' for Contract R&D services to selected SOEs
6.	International Contract R&D	 Strategic Contract R&D partnerships with selected international companies FP7 quality response 	 a CSIR that is seen as the preferred supplier of Contract R&D for selected international partners scientific excellence

* Implementation of the key initiatives and associated outcomes outlined are dependent on approval of the associated Contract R&D Local and International Funding Portfolio Budget 2010/11.

- Complete Tables 1 and 2 (key performance indicators) providing the one year and three year targets that indicate successful achievement of the strategy and plans. Table 1 covers the strategic role and Table 2 covers the support role, as described in the Preamble to the Planning template. Table 2 also covers standard management issues.

1. Vision, mission and value proposition

Complete Table 3. Provide the vision and mission of the <u>PORTFOLIO</u>. Describe the <u>UNIT's</u> value proposition and explain its reason for existence and how will it contribute to CSIR priorities and strategic objectives.

Table 3Vision, mission, value proposition

Vision:

• To have a robust and sustainable <u>Contract R&D Local and International Funding Portfolio</u>, which enables the CSIR to fulfil its mandate and its role within the NSI.

Mission:

- To have the optimal quality and high value <u>Contract R&D Local and International Funding Portfolio</u> congruent with the organizational strategy.
- To optimize the CSIR Strategic <u>Contract R&D Local and International Funding Portfolio</u> by enabling the
 organization to optimise its resources, core skills, and competencies in support of national goals by
 leveraging resources and capabilities from the national, regional, and global market.
- To leverage public, private, and international partnerships in support of cutting-edge science, engineering and technology.

Unit-specific value proposition:

- The Contract R&D Unit is in a unique position to add value, enable impact, and to optimize the CSIR Contract R&D Local and International Funding Portfolio through its critical mass of multi-disciplinary staff.
- Our competitive advantage is the broad understanding, knowledge, experience, and network of relationships the several sectors.
- As part of the CSIR R&D Core, the Contract R&D Unit is uniquely placed to facilitate access to government, industry and international sectors – we have a good understanding of government policies and implementation strategies, as well as the science and technological competences of the CSIR. We therefore play a leading role in translating these into the national development agenda in collaboration with the public, private and international sectors.

Unit-specific reason for existence:

 The CR&D Unit is strategically positioned with regard to its internal stakeholders and external partners through a strategic R&D Contract management and partnering interface, supported by science and technology competencies. This is designed to enable clear understanding of the national imperatives and the needs of the industry to optimise the impact of CSIR R&D outputs.

[Supporting table below to the value proposition]					
Priority Area ¹⁹	Core and supportive activities	Activities to partner, buy, contract in or outsource	Activities not done		
Portfolio management	- KPI reporting - Monitoring and evaluation	- OUs	- OU level reporting		

2. Situational analysis

• Briefly review the strategic health of the unit, specifically considering the need for strategic development, and the capacity to deliver the service desired.

2.1 The mandate and strategic priorities of the Contract R&D Local and International Funding Portfolio

The CSIR Contract R&D Local and International Funding Portfolio Plan adheres to the mandate of the CSIR, i.e. to perform directed and multidisciplinary research and technological innovation, fostering industrial and scientific development, in cooperation with the public and private sectors and to improve the quality of life of South Africans.

The Contract R&D Local and International Funding Portfolio is aligned with, and endeavours to support, the CSIR strategic priorities:

- building and transforming human capital;
- strengthening the SET base and performing relevant R&D;

¹⁹ Consider issues such as Research, Development, R&D output, HCD

- transferring technology and skilled human capital; and
- maintaining financial sustainability and good governance.

The Portfolio's contribution

Our vision is to have a robust and sustainable Contract R&D Local and International Funding Portfolio, which enables the CSIR to fulfil its mandate and its role within the NSI.

- This will be done in partnership with local, African and international role players in the public and private sectors, SOEs and funding agencies.
- The Contract R&D Local and International Funding Portfolio will contribute to financial sustainability, and ensure that CSIR remains relevant and on the forefront of technological innovation.

2.2 The aims of the Contract R&D Local and International Funding Portfolio

The implementation of the CSIR B60 strategy demanded a change to focus activities on R&D that are aligned with the mandate. This called for a healthier balance of activities along the Research Development and Innovation (RDI) value chain, and a more defined and explicit strategy for Contract R&D.

The intended outcomes of the CSIR Contract R&D Strategy include:

- a balanced Contract R&D Local and International Funding Portfolio across the RDI value chain;
- significant strategic partnerships;
- a CSIR that is seen as the preferred supplier of Contract R&D for key actors in the public and private sectors, SOEs and funding agencies;
- improved service delivery and implementation in the public sector;
- recognised CSIR contribution to the sustainable growth of selected economic sectors; and
- significant external income contributing to the financial sustainability of the CSIR.

An efficiently implemented Contract R&D Plan will ensure CSIRs contribution to industrial development, bring about new technological advances, technology transfer and commercialisation; and support financial sustainability.

2.3 Key issues to be addressed

• Complete Table 4. Summarise the key challenges and opportunities that the Portfolio needs to address over the medium-term horizon.

A number of strategic issues to be addressed that collectively seek to strengthen the CSIR Contract R&D Local and International Funding Portfolio, as well as key findings of the CSIR Customer/Stakeholder Survey have been taken into account, as shown in Table 4.

Key issues to be addressed

Contract R&D Unit-specific:

- Institutionalise the strategic relationship management process for key Contract R&D partnerships
- Define and structure strategic Contract R&D initiatives with the primary intent being to enable the CSIR to conduct research that is both endorsed by the mandate and is an integral part of the South African government's science and technology strategy

• Package and communicate CSIR successes in an appropriate format for customer segments <u>CSIR-wide</u>:

Promote the CSIRs collaborative research ability and multi-disciplinary approach as part of the CSIR generic value proposition

Key issues to be addressed

- Promote CSIRs role in shaping South Africa's scientific agenda
- Leverage the national strategies and initiatives in support of the Contract R&D Strategy
- The emerging B-BBEE and IP legislation are important developments that have challenging strategic and operational implications for the portfolio
- Develop the appropriate skills, competencies and demographics in line with the CSIR Human Capital Development Strategy, guided by the needs and requirements of the specific context within which the Contract R&D Local and International Funding Portfolio operates

The key challenges and opportunities faced by the CSIR Contract R&D Local and International Funding Portfolio are shown in Table 5 below.

Table 5Key challenges and opportunities

Challenge	Opportunity	
Human capacity	- Secondments from Units/Centres	
Public sector income	- Partner with DST and Line Departments	
Private sector income	- Targeted business development	
Africa - Scientific leadership		
SOEs	- Establish credibility	
Funding agencies	- Establish strategic partnerships	

3. Strategic and operational plan – 2010/11 to 2012/13

3.1 Strategic context

The CSIR Contract Research and Development (R&D) Policy was approved by the CSIR Board in February 2008. The policy provides guidelines on the CSIR approach to Contract R&D. In essence, the CSIR undertakes Contract R&D that complements the CSIR strategic priorities and research and innovation activities²⁰, subject to acceptance of a formal contract.

The CSIR Contract R&D Plan is based on the development agenda of South Africa and the role of the CSIR within the National System of Innovation (NSI). It takes cognisance of the DST Ten-Year Innovation Plan, relevant national strategies and the revised National Industrial Policy Action Plan (IPAP) and associated draft dti Technology Policy Framework.

The Parliamentary Grant provides the means to develop the S&T base upon which offerings to the market are made and R&D outputs and outcomes are realised. A robust Contract R&D Local and International Funding Portfolio is essential to fulfil the CSIR mandate and its role within the NSI. A number of strategic interventions have been outlined that collectively seek to strengthen the CSIR contribution to, and international, State Owned Enterprises (SOEs) and funding agencies. Strategic issues including the findings of the 2008 CSIR Customer/Stakeholder Survey have been taken into account and incorporated into the Plan.

3.2 The strategic focus areas

The CSIR Contract R&D Plan focusses on the public and private sectors. Each of these can be segmented into local, African and international markets. State owned enterprises have been added as a segment due to their increasing role in socio-economic development and because of their programmes to build the local supplier base through the Competitive Supplier Development Programme (CSDP). Funding agencies are included due to their

CSIR Contract R&D Strategic and Operational Plan 2010/11 to 2012/13

²⁰ Frascati/CSIR Definitions of Research and Innovation Categories

increased role in funding research and development, particularly through the emergence of the Technology Innovation Agency (TIA).

The schematic in Figure 1 illustrates the key sectors and sub-sectors of the Plan.

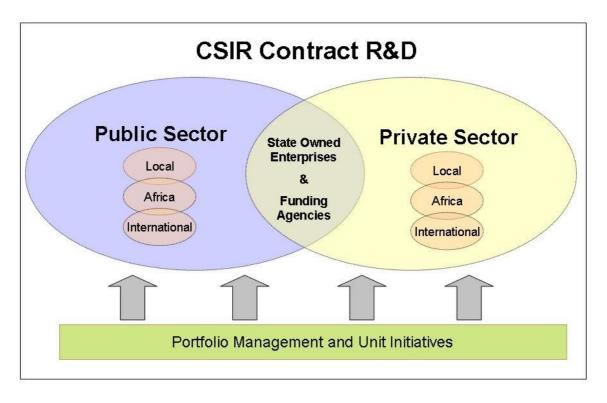

Figure 1	The main pillars of the CSIR Contract R&D Local and International Funding
-	Portfolio Plan

3.2.1 The public sector

Public sector Contract R&D provides the opportunity for the CSIR to demonstrate relevance, application, and the benefit of its offerings in the public domain. It enables the CSIR to share its scientific and technical expertise and make a meaningful contribution on a larger scale to society. It provides an opportunity to contribute science and technology leadership for local, national and global needs. In this way, it provides researchers with understanding of real-world challenges and technology implementation realities, which leads to more successful technology transfer and impact.

3.2.1.1 The public sector: local

Locally, the various government departmental Medium Term Expenditure Frameworks (MTEFs) inform the CSIR Contract R&D Plan. A concerted effort is being made to ensure CSIR alignment with the goals of the MTEF, as they give rise to significant Contract R&D opportunities. Increases in sector-specific research expenditure are expected from many Line Departments, offering opportunities for growing public sector funding for Contract R&D work. The CSIR will also support provincial and metropolitan structures by providing Contract R&D offerings focussed on improving service delivery and implementation at local scale.

3.2.1.2 The public sector: Africa

The CSIR aims to contribute to Africa's development in line with the AU framework through strategic Contract R&D partnerships with relevant international development agencies. It

will undertake strategic Contract R&D engagement and opportunities, and it will remain involved in the NEPAD S&T Consolidated Plan of Action and S&T bilaterals.

- Collaborative, needs-based S&T Flagships
- Technology transfer and knowledge-based services in thematic/sector areas

3.2.1.3 The public sector: International

International Contract R&D within the public sector enables the CSIR to contribute to the global pool of knowledge, access opportunities for strengthening the SET base and contribute to financial sustainability. It also acts as an important benchmark of relevance and quality. The European Union (EU), the USA, China, France and the UK are the top foreign countries from which the CSIR has secured Contract R&D. Specific effort will now go into building on this track record and expanding CSIRs reach.

3.2.2 The private sector

It is a CSIR objective to support the private sector with competitive R&D that fosters industrial development aligned with our mandate. This requires a strategy that ensures that CSIR undertakes a significant portion of private sector Contract R&D which is balanced across the RDI Chain. CSIR has developed thematic research areas to enable us to position its competencies in specific sectors. This will be achieved by developing strategic partnerships with key players with whom we can undertake significant research that contributes to national priorities and improvement in quality of life. An additional objective is to articulate the CSIR contribution to, and interaction with, the private sector, and for the CSIR to demonstrate activities relating to its industrial development contribution.

3.2.2.1 The private sector: Local

The CSIR aims to obtain more of the South African private sector R&D spend. This entails increasing the portion of available business expenditure on Research and Development (BERD) spend and, in turn, increasing the CSIR share from the current 2,4% of BERD level²¹. Specific initiatives have been outlined to assist OUs in achieving their business plan targets in this sector.

3.2.2.2 The private sector: Africa

The private sector is regarded as the engine of growth in Africa. It is recognised that technological innovation and technology transfer activities are required to achieve this growth. The CSIR will support local private companies and multinationals in Africa, and take advantage of opportunities provided by country bilateral and multilateral agreements. CSIR will provide services to the African private sector across the value chain and thereby contribute to industrial development as outlined by the Council of African Ministers on Industry (CAMI).

3.2.2.3 The private sector: International

The key challenge within the international sector is to increase strategic Contract R&D initiatives with multinationals and more private sector companies.

3.2.3 State owned enterprises

SOEs have the specific role of achieving strategic public objectives in those areas of the economy where purely private sector participation would cause compromise, given the private enterprise focus on achieving market-related returns on capital. Given the special character of the SOE, the CSIR is paying special attention to the Competitive Supplier Development Programme (CSDP).

CSIR Contract R&D Strategic and Operational Plan 2010/11 to 2012/13

²¹ The CSIR Private Sector Analysis, CSIR Contract R&D Unit, 2007

3.2.4 Funding agencies

Funding agencies have been added as an important component of the Contract R&D Strategy, due to their increasing role in funding research and development across the innovation chain, and the emergence of the Technology Innovation Agency (TIA).

3.3 Key initiatives

.

• Describe the key initiatives that will be implemented in the portfolio to support fulfilment of its strategy by completing **Table 6**.

Strategic objectives	Strategic focus area	Key initiatives to be implemented by the Unit to support fulfilment of its Strategy 2010/11		
Unit specific strategic focus areas				
Local	Public sector	 Support CSIR Units to promote CSIRs broad portfolio and depth of expertise, collaborative research ability and multi-disciplinary approach in addressing national priorities Develop strategic partnerships by putting in place Memoranda of Agreement (MoA) with key line departments to provide multidisciplinary Contract R&D and scientific leadership through the MTEF cycle Enable CSIR Units to enhance the quality and impact of CSIR Contract R&D with the public sector, while ensuring alignment with and support for national priorities and related initiatives (such as the World Cup 2010) Enable CSIR Units to contribute to key sectors identified in the Industrial Policy Action Plan (IPAP) through the dti/CSIR Institutional Framework of Cooperation Enable CSIR Units to provide scientific leadership in the technology transfer of existing technologies at the provincial and metropolitan level 		
Africa		 Position CSIR Units to secure strategic Contract R&D through key programmes and relevant international development agencies Enable CSIR Units to support the NEPAD S&T Consolidated Plan of Action and to develop S&T sector plans Involvement in other regional activities that support the broader objectives of NEPAD (WAITRO, ST-EAP, RRA, GRA) 		
International		 Leverage the solid CSIR track record and position the CSIR as a global player with other leading players through collaborative R&D Communicate CSIR successes and grow relationships to provide multidisciplinary offerings Optimise CSIR involvement in the EU Framework Programmes (FP) and Support Actions by communicating our participation in collaborative research projects that we are currently engaged in under the FP banner Implement the Science and Technology Europe Africa Programme (ST-EAP), which serves as a platform for the advancement of EU-Africa S&T co-operation 		
Local	Private sector	 Leverage the national strategies and initiatives in support of the Private Sector Plan Recognise the indirect and non-private sector contribution to fostering industrial development Recognise intellectual property, royalties and technology transfer activities in CSIR annual reporting on the private sector Improve the ratio of the private sector spend to science councils (SCs) and tertiary education institutions (TEIs) through collaboration Facilitate opportunities for the development of local supplier capacities that the CSIR can support, in support of the SOE CSDP 		
Africa	_	 Facilitate opportunities for: Contract R&D Consulting and Analytical Services Enterprise Creation for Development 		
International		 Target selected local large and/or Multinational Corporations that have strategic interests relevant to the CSIR mandate 		

Table 6	Contract R&D strategic focus areas and key initiatives
---------	--

Strategic objectives	Strategic focus area	Key initiatives to be implemented by the Unit to support fulfilment of its Strategy 2010/11
		 Communicate and promote CSIR successes per segment Participate in relevant international fora Increase international Contract R&D opportunities with targeted multinationals, such as Boeing, Airbus, and Syngenesis
Promote and provide integrated multidisciplinary capabilities to develop key solutions and products to support large infrastructure investment, addressing issues of economic growth and social development, particularly in service delivery	State owned enterprises	 Promote strategic relationship management with selected key SOEs, such as Eskom, Transnet, Denel Facilitate CSIR support to the Competitive Supplier Development Programme Leverage CSIRs understanding of national strategies and initiatives in support of SOE projects Illustrate CSIRs track record and successes in managing complex collaborative multi-party initiatives
Put in place relationship management systems for key agencies, such as the TIA	Funding agencies	 Establish, manage and monitor CRM processes Package and communicate per customer segment
Strengthening the	service quality and o	delivery capacity
 Consolidated and integrated reporting on organisational performance against planned targets Customer/Stake holder segmented events 	- Support to Units as required	 Report on operational performance in respect of the Contract R&D Local and International Funding Portfolio on a monthly and quarterly basis Monitor the strategic profile and health of the CSIR Contract R&D Local and International Funding Portfolio and report on a quarterly basis Support Units and incorporate feedback into relevant CSIR fora
Enhancing cost e	ffectiveness and mair	ntaining good corporate governance
- Effective Contract R&D Unit in place	Effective management of the Contract R&D Unit	 Resource Unit with appropriate capacity Ensure adequate budget to provide effective service levels Appointment and management of human resources Financial management

3.4 Operational excellence and service quality

• Describe the key initiatives that will be implemented in the unit to support operational excellence and service quality by completing Table 7

Operational excellence and service delivery		
Quality management system	- As per EHS standard	
Enhance service delivery and review of business processes	 Contract R&D Forum Contract R&D Local and International Funding Portfolio reporting KRAs and performance review 	
Optimise effectiveness and efficiency	 KPI quarterly reporting CSS OPCO KRAs and performance review 	
Appropriate use of resources:	KRAs and performance reviewAs per approved organogram	
1) Resources of skills available	- As per approved organogram	
2 Resources of skills to be added	- As per approved organogram	

3.5 Finances and corporate governance

- Provide a summary, in bullet form, of the main initiatives and plans to achieve the unit's strategic objectives and targets for maintaining financial sustainability and good corporate governance (as provided in the KPI table).
- Complete **Tables 8** (income statement) and **Appendix A** (risk management plan). The Finances department will provide unit or department specific income statements.
- Complete **Tables 9 and 10** using the departmental sub-divisions as indicated by the specific income statements

Table 8Income statement

4. The application framework

4.1 The Contract R&D Policy

The CSIR Contract R&D Policy was approved by the CSIR Board in February 2008. The policy provides guidelines on the CSIR approach to Contract R&D²².

4.2 Management, roles and institutional structures

To support the Contract R&D Local and International Funding Plan, existing institutional structures, roles and responsibilities to ensure that the Contract R&D Local and International Funding Portfolio contributes to the CSIR strategic objectives, the key structures and interfaces are outlined in Figure 2 below.

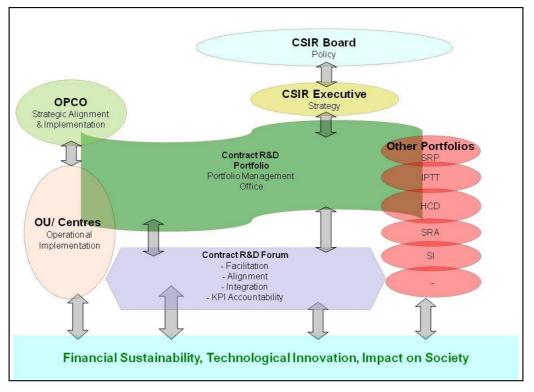

Figure 2 CSIR institutional structures and roles relating to the Contract R&D Local and International Funding Portfolio

The institutional structures, roles and responsibilities are outlined in Table 13.

Table 13 Institutional structures, roles and responsibilities

Structure	Roles and responsibilities
CSIR Board	Define policy
CSIR EXCO	 Provide strategic leadership with regard to CSIR Contract R&D

²² http://intraweb.csir.co.za/policy/docs/156204.pdf.

Structure	Roles and responsibilities
CSIR GE: Operations	 Recommend the strategy for approval in consultation with role players and ensures that implementation takes place according to policy
CSIR OPCO	 Ensure strategic alignment and implementation
Contract R&D Local and International Funding Portfolio office	 Develop strategy, portfolio leadership, CR&D Unit management, KPIs, targets and benchmarks
Contract R&D Forum	 Ensure operational alignment with the Contract R&D Policy and Strategy Facilitate, align and integrate CSIR-wide interventions that involve more than one unit
Unit/centre: Contract R&D Managers or designates	 Drive, coordinate and facilitate Contract R&D plans and execution Drive Contract R&D KPI delivery at unit level Responsible for driving key strategic R&D initiatives Plan, manage, review and monitor unit delivery in terms of Contract R&D Ensure compliance through: Use of contract routing forms and Internal audit in accordance with the annual audit plan as approved by the Audit and Risk Committee of the CSIR Board

4.3 Monitoring and evaluation

A number of KPIs to measure the response of the organisation are outlined annually in the KPI section of the CSIR Operational Plan. Other qualitative and quantitative monitoring criteria are outlined in Table 14.

Table 14	Proposed quality	tative and quantita	ative monitoring criteria
----------	------------------	---------------------	---------------------------

Qualitative									
Issue	KPI								
Quality of relationships	 Customer satisfaction: 80% minimum acceptable standard 								
Quality of Contract R&D output	- R&D outcomes: as specified in the KPIs								
Quality of Contract R&D impact	- To be determined								

Quantitative										
Issue	КРІ									
Contract R&D content (Type of Research Activity)	 ABC research mix: healthy distribution across the RDI value chain 									
Growth in Contract R&D	 Contract R&D growth measure: % Year-on-year Growth 									
Diversification of revenue	- Appropriate Contract R&D to PG ratio									

	Quantitative
streams	 Appropriate public to private sector ratio Appropriate representation of funding across market segments (public/private)

5. The concluding remarks

A robust and sustainable Contract R&D Local and International Funding Portfolio is essential to fulfil the CSIR mandate and its role within the NSI. A number of strategic interventions have been outlined that collectively seek to strengthen the CSIR contribution to, and interaction with, the public and private sectors, taking into account the local, African, international, SOE and funding agency segments.

The strategic objectives for the CSIR Contract R&D Local and International Funding Portfolio have been outlined. The specific role of the CSIR Contract R&D Unit has been specified.

The revised plan submitted on 15 January 2010 incorporates the Portfolio's response to the key issues raised by the OUs and Centres and in the Strategic and Operational Plan presentation on 11 December 2009.

Clarification of Roles

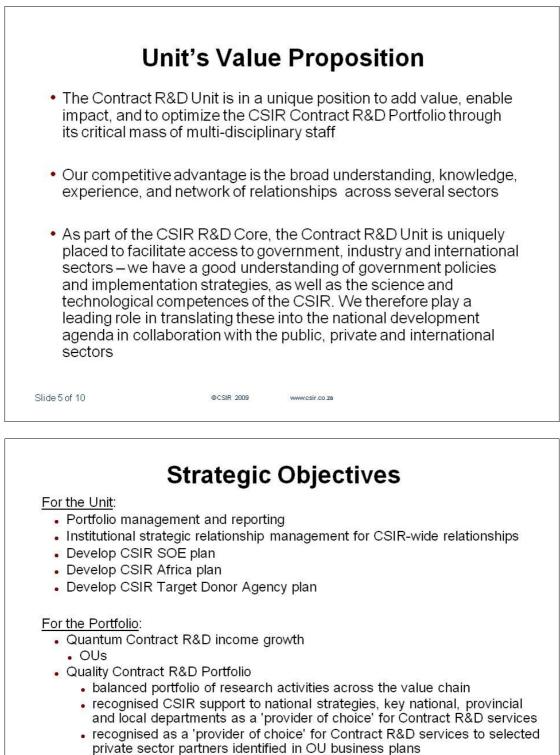

Vision for the Portfolio

- To have the optimal quality and high value Contract R&D
 Portfolio congruent with the organizational strategy
- Role of the <u>Unit</u>

• To optimize the CSIR Strategic **Contract R&D Portfolio** by enabling the organization to optimise its resources, core skills, and competencies in support of national goals by leveraging resources and capabilities from the national, regional, and global market

Slide 4 of 10

@CSIR 2009 www.csir.co.za

- recognised as a 'provider of choice' for Contract R&D services to key selected multinationals
- recognised CSIR contribution to the African Continent, with strategic alliances and international development partners

www.csir.co.za

Slide 6 of 10 @CSIR 2009

Key Implementation Initiatives to be driven by the Unit 2010/11

1	Portfolio management	Institutionalise the strategic relationship management process for key Contract R&D partnerships	strategic Contract R&D partnerships
		KPI monitoring, evaluation and reporting	a balanced Contract R&D Portfolio across the RDI value chain
2	Public sector	Facilitate strategic Contract R&D partnerships with selected key Line Departments, provincial and local structures	recognised CSIR support to national strategies, key national, provincial and local departments as a 'provider of choice' for Contract R&D services
3	Private sector	Strategic Contract R&D partnerships with selected local private sector companies	recognised as a 'provider of choice' for Contract R&D services to selected private sector partners and MNCs
4	Africa	Africa Contract R&D Plan	recognised CSIR contribution to the African Continent, with strategic alliances and international development partners
5	State Owned Enterprises (SOEs)	Develop special approaches for (2) SOEs	a CSIR that is recognised as a 'provider of choice' for R&D services to selected SOEs
6	International Contract R&D	Strategic Contract R&D partnerships with selected international companies FP7 quality response	a CSIR that is seen as the 'provider of choice' Contract R&D for selected international partners scientific excellence

Key Challenges & Opportunities for the Portfolio

Challenge	Opportunity
Human capacity	- Secondments from Units/Centres
Public sector income	- Partner with DST and Line Departments
Private sector income	- Targeted business development
Africa	- Scientific leadership
SOEs	- Establish credibility
Funding agencies	- Establish strategic partnerships

KPI Targets for the Portfolio

www.csir.co.za

KPI

Value of contract R&D income supporting national strategies, Rm

Value of private sector contract R&D income (Rm, % of total contract R&D income)

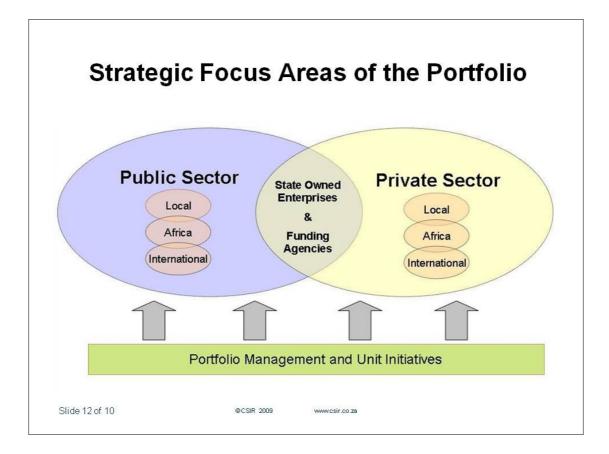

Value of public sector contract R&D income (Rm, % of total contract R&D income)

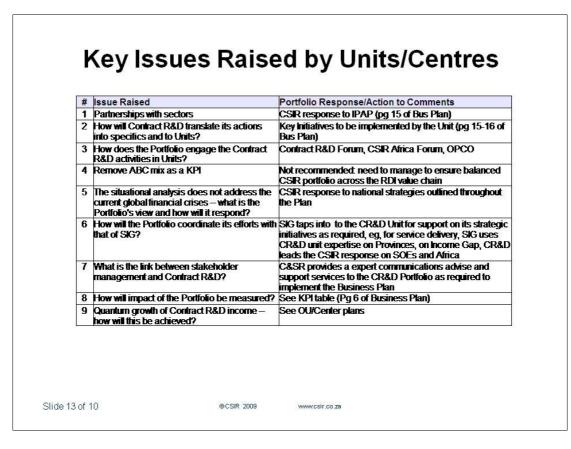

Ratio of type A:B:C:D:E activities calculated on contract R&D income

Customer satisfaction

Slide 10 of 10

@CSIR 2009 www.csir.co.za

Unit-	Institutionalise the strategic relationship management process for key Contract R&D
specific	partnerships
	Define and structure strategic Contract R&D initiatives with the primary intent being to
	enable the CSIR to conduct research that is both endorsed by the mandate and is an
	integral part of the South African government's science and technology strategy
	Package and communicate CSIR successes in an appropriate format for customer
	segments
	Inter-phase among Portfolio's
	Workshop on external relations
	Africa plans must involve other Portfolio's
	SOE plans must be collective
	Analysis of Public Departments of lead and lag on key relationships
CSIR-wide	Promote the CSIRs collaborative research ability and multi-disciplinary approach as part of
	the CSIR generic value proposition
	Promote CSIRs role in shaping South Africa's scientific agenda
	Leverage the national strategies and initiatives in support of the Contract R&D Strategy
	The emerging B-BBEE and IP legislation are important developments that have challenging
	strategic and operational implications for the portfolio
	Develop the appropriate skills, competencies and demographics in line with the CSIR
	Human Capital Development Strategy, guided by the needs and requirements of the
	specific context within which the Contract R&D Portfolio operates
	Coherence in stakeholder management

	Strategic Focus Area Public Sector						
Strategic objectives	Strategic focus area	Key initiatives to be implemented by the Unit to support fulfilment of its Strategy 2010/11					
Unit specific	strategic focu	s area s					
Local	Public sector	Support CSIR Units to promote CSIRs broad portfolio and depth of expertise, collaborative research abili and multi-disciplinary approach in addressing national priorities Develop strategic partnerships byputting in place Memoranda of Agreement (MoA) with keyline departments to provide multidisciplinary Contract R&D and scientific leadership through the MTEF cycle Enable CSIR Units to enhance the quality and impact of CSIR Contract R&D with the public sector, while ensuring alignment with and support for national priorities and related initiatives (such as the World Cup 2010) Enable CSIR Units to contribute to key sectors identified in the Industrial PolicyAction Plan (IPAP) through the dil/CSIR Institutional Framework of Cooperation Enable CSIR Units to provide scientific leadership in the technology transfer of existing technologies at the provincial and metropolitan level					
Africa		Position CSIR Units to secure strategic Contract R&D through key programmes and relevant international development agencies Enable CSIR Units to support the NEPAD S&T Consolidated Plan of Action and to develop S&T sector plans Involvement in other regional activities that support the broader objectives of NEPAD (WATRO, ST-EAP, RRA_GRA)					
International		Leverage the solid CSIR track record and position the CSIR as a global player with other leading players through collaborative R&D Communicate CSIR successes and grow relationships to provide multidisciplinary offerings Optimise CSIR involvement in the EU Framework Programmes (FP) and Support Actions by communicating our participation in collaborative research projects that we are currently engaged in under the FP banner Implement the Science and TechnologyEurope Africa Programme (ST-EAP), which serves as a platform for the advancement of EU-Africa S&T co-operation					

Strategic objectives	Provide Contraction of the second second	Key initiatives to be implemented by the Unit to support fulfilment of its Strategy 2010/11
Local	Private sector	Leverage the national strategies and initiatives in support of the Private Sector Plan Recognise the indirect and non-private sector contribution to fostering industrial development Recognise intellectual property, royalties and technology transfer activities in CSIR annual reporting on the private sector Improve the ratio of the private sector spend to science councils (SCs) and tertiary education institutions (TEIs) through collaboration Facilitate opportunities for the development of local supplier capacities that the CSIR can support, in support of the SOE CSDP
Africa		Facilitate opportunities for: Contract R&D Consulting and Analytical Services Enterprise Creation for Development
nternational		Target selected local large and/or Multinational Corporations that have strategic interests relevant to the CSIR mandate Communicate and promote CSIR successes per segment Participate in relevant international fora Increase international Contract R&D opportunities with targeted multinationals, such as Boeing, Airbus, and Syngenta

Strategic Focus Area State Owned Enterprises

Strategic objectives	Strategic focus area	Key initiatives to be implemented by the Unit to support fulfilment of its Strategy 2010/11
Promote and provide integrated multidisciplinary capabilities to develop key solutions and products to support large infrastructure investment, addressing issues of economic growth and social development, particularly in service delivery	State owned enterpris	es Promote strategic relationship management with selected key SOEs, such as Eskom, Transnet, Denel Facilitate CSIR support to the Competitive Supplier Development Programme Leverage CSIRs understanding of national strategies and initiatives in support of SOE projects Illustrate CSIRs track record and successes in managing complex collaborative multi-party initiatives
Slide 17 of 10	©CSIR 2009 ₩	wycsir.co.za

		Key initiatives to be implemented by the Unit to support fulfilment
		of its Strategy 2010/11
Put in place relationship management systems for key	Funding agencies	Establish, manage and monitor CRM processes
agencies, such as the TIA		Package and communicate per customer segment
